

Araceli Domínguez

Technical leadership · Full-stack development · Applied AI and digital products

aracelidominguezmuelas@gmail.com

I build and evolve digital products, from architecture decisions through to production. Over 20 years of experience, including international roles. Since 2022 I have been working at Gymkana Digital Turística.

Professional experience

Gymkana Digital Turística

Technical leadership · January 2022 - present

- I lead the technical side and work end to end on digital products for towns and tourist destinations: architecture, development, prioritisation, validation, security and production deployment.
- Evolution of the Laravel and Filament admin panel, including project and permission management, multilingual content, metrics and exports; full-stack work with PHP, MySQL, WordPress, front end and integrations.
- Work on the definition, architecture and development of an AI tourist assistant currently in pilot, with answers grounded in information provided and validated by each destination.
- Work on information retrieval and RAG, prompts, model comparison, answer evaluation, multilingual support, and analysis of queries, quality, cost and latency to guide improvements.

Bulevip

Senior Full Stack Developer · June 2020 - December 2021

- Full-stack development for e-commerce using PHP (Symfony and Laravel), HTML/SCSS, React and Vue.js.
- Work with Docker, messaging and cache systems, TDD/BDD testing and version control.

LEXICON Research Group · University of Granada

Computational Linguistics · 2018 - 2020

- Development of a phraseology extraction module for building semantic frames in specialised domains.

Antonio de Nebrija University

Senior Full Stack Developer · November 2011 - February 2018

- Technology migration of management applications while maintaining the legacy system in parallel.
- Creation of university management tools and educational applications from analysis and information architecture through development and testing.
- Integration of university management systems with Ministry of Education services and improvement of support processes.

Mobile Dreams

Senior Web Programmer & Designer · 2009 - 2011

- Development of web and mobile applications and interactive campaigns, plus coordination of external development teams.
- Part of the team that won a Gold Lion at Cannes Lions 2010 for an interactive iPhone catalogue.

Jasmine Technologies · New York

Full Stack Developer · 2005 - 2007

- Software development from design through production and support of critical applications.
- Technical liaison with non-technical colleagues and preparation of software specifications in English and Spanish.

Early career

Vivocom

Programmer & Developer · 2008 - 2009

- Development of IP television platforms, content management systems, Web 2.0 tools and Video SEO.

Schibsted Spain

Graphic Design & Web Marketing Analyst · 2004 - 2005

- Digital design and web marketing, including search visibility, conversion, performance and analytics.

Grupo Planeta

Graphic/Web Designer & Programmer · 2002 - 2004

- Design and development of editorial websites, newsletters and digital campaigns; content coordination.

Maximiles Group

Graphic Designer & Webmaster · 2000 - 2002

- Web programming and maintenance, interactive design and production of digital assets.
